Nature Trails & Study Tours

We conduct nature trails at & around Dapoli & Anjarle (a coastal village) situated about 250 kms south of Mumbai which is ideal for weekend trips & outing.

- During the trail, information is given about plant species, birds, butterflies & other creatures which come across.
- Information about various components like soil, air & water is discussed.
- Ultimate goal of such trails is to explain human beings' role in conservation of nature & various natural resources.
- Bottom line of the trail is to elucidate the fact that human beings are one of the components of environment & not a separate entity that can survive without other components.

- Landscape Designing and Gardening
- Vegetable and Fruit Growing
- Organic Farming
- Farm Management System
- Butterfly & Bird Garden
- Biodiversity Plantation
- Freelance Writing & Lectures

About Krishivarada

We Provide,

- Technical guidance based on regular site visits & interaction with the client. Our self formulated system includes suggestions & follow up in the areas like planting & after care of various crops.
- The best possible inputs keeping in view commercial aspect of agriculture.
- Guidelines & inputs for appropriate execution & maintenance.

We believe in the fact that, **Nature plays a key role in success of any agriculture related enterprise** and our inputs are in synchronization with it.
